

I would like to inform you of my opposition to this petition. If the petition is granted it will definitely affect the indepent ISP and allow for monopolization of markets. Although I do not have much faith in your agency, as you like to fall prey to big money lobbies, I feel it necessary to tell you what one consumer thinks. If this petition is granted you will allow large phone companies the ability to stop service to whomever they want, aka the competition. This is bad for everyone, now ISP prices are low due to competition, but with this petition we no longer have competition and then prices just go up. For an example of this look at the cable companies, at what point have the prices for cable come down due to deregulation - never that's when. Do not OK this petition, do not squash fair market practises.

Thank you.
